

Desenvolveu o backend e testou a saída GET e POST.

Pode-se observar o **get** na saída Browser Chrome ao acessar o endereço <https://localhost:44395/api/contact>

```
[
  {
    "$id": "1",
    "id": "d3bd6a22-4587-eb11-9738-342387756568",
    "name": "Arquibritts",
    "email": "arquai@ihaoo.com",
    "telefone": "984452007  ",
    "password": "dd400f98c6748721b8706b243884b212"
  },
  {
    "$id": "2",
    "id": "763f23d4-4b88-eb11-9739-342387756568",
    "name": "Arquibritts",
    "email": "arbuai@ihaoo.com",
    "telefone": "984452007  ",
    "password": "dd400f98c6748721b8706b243884b212"
  },
  {
    "$id": "3",
    "id": "f101b4fd-1784-eb11-9737-342387756568",
    "name": "Augusto",
    "email": "ac90_34567@gmail.com",
    "telefone": "99999999  ",
    "password": "55eb15a477cf7bd38a71033e1c130373"
  },
  {
    "$id": "4",
    "id": "c9460bf1-1480-eb11-9737-342387756568",
    "name": "Felipe Denner",
    "email": "fdnn01@xyz.com",
    "telefone": "9844520005  ",
  }
]
```

Este método **Get** mostra todos os contatos cadastrados.

Para o Post usou-se a ferramenta Fiddler para incluir registro no nosso BD.

POST https://localhost:44395/api/contact HTTP/1.1 EXECUTE SAVE

Headers (4) Params (0) Raw Body Collapse All

Text JSON XML HTML Form-Data x-www-form-urlencoded

```
1 {
2   Name : "Orejjuella",
3   Email: "vnildi@ihaoo.com",
4   Telefone: "986652007",
5   Password: "constancil",
6   ConfirmPassword: "constancil"
7 }
```

Response BODY: 100 B HTTP/1.1 200 Collapse All

Headers (6) Cookies (0) Raw Preview Body

Text JSON XML

```
1 {
2   "$id": "1",
3   "name": "Orejjuella",
4   "email": "vnildi@ihaoo.com",
5   "phone": "986652007"
6 }
```

O backend desta API WEB está funcionando até aqui. Resta outros métodos. Mas, isto fica para outro momento.
